

We solved ragging problems for
City of Tawas City

MICHIGAN

TWO 10HP
DRY-PIT PUMPS

WITH PRO
CONTROLLER

VACATION
TOWN

PROBLEMS PRE-DERAGGER

- Pumps required cleaning as often as **THREE** times per week.
- Confined space station requires **THREE PEOPLE** present to clean out pumps.

ESTIMATED CUSTOMER MONTHLY SAVING:

\$1,200 to \$3,600
(\$300 per clean, 1-3 per week)

"We were coming to clean these pumps as often as three times a week, and we haven't had to clean either a single time since installing the DERAGGERS!

This is especially helpful given the station is in a confined space, so requires three people to be present when cleaning the pumps. Dealing with ragging was wasting not one but three people's time that is now used better elsewhere."

Mike Bocker, City of Tawas City Operator

Information and cost estimate provided by City of Tawas City, MI.

SOLUTION

- Installed **TWO** DERAGGER™+ units, one on each pump, with *Real Time Pump Protection™* used to detect rags, pass them through and keep pumps running clean.
- Upgraded panel with a **DERAGGER™ PRO**. This also provides data on the performance of the pumps and DERAGGER+ devices.

BENEFITS

- Elimination of ragging problem with pumps not requiring cleaning once since installation of DERAGGERS.
- Quick return on investment and greatly reduced risk to employees.
